SUMMARY

Fourth-year Computer Science student with hands-on experience building a full-stack, blockchain-backed election platform using React, Node.js, and Supabase/PostgreSQL. Interested in software development, applied machine learning, and MLOps.

EDUCATION

Bataan Peninsula State University — Balanga, Bataan
Bachelor of Science in Computer Science | GWA: 1.4 — Expected July 2027

- **Thesis:** VoteX: Blockchain-Based Voting System for Bataan Christian College Inc. using Sentiment Analysis
- Relevant coursework: Data Structures, Database Systems, Software Engineering | Dean's Lister

Bataan National High School — Balanga, Bataan
Senior High School Diploma, STEM, With High Honors — 2023

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL
Frameworks & Tools: React, Node.js, Tailwind, Supabase, PostgreSQL, Git/GitHub, REST APIs, Docker, Solidity
AI-Assisted Development: Claude, OpenAI, GitHub Copilot, DeepSeek
Interests: AI, Machine Learning, Deep Learning, Software Development, MLOps | **Spoken Languages:** English, Filipino

PROJECTS

VoteX: Blockchain-Based Voting System for Bataan Christian College Inc. using Sentiment Analysis (Thesis) — Jan 2026 – Sept 2026
Full-stack web application with Node.js API, Supabase/PostgreSQL, and blockchain module — vote-x.app

- Developed a secure election platform covering the full lifecycle: setup, voter and candidate management, scheduling, voting, and admin monitoring/analytics
- Implemented role-based access for admins, student voters, and candidates, with security and auditability as core design priorities
- Integrated a blockchain module to make recorded votes tamper-evident and independently verifiable
- Built a Node.js sentiment analysis service powered by GPT-OSS 20B that analyzes voter feedback and candidate comments
- Designed database schema and migrations in Supabase/PostgreSQL
- Conducted user evaluation with 100 students and 10 professionals, an overall mean of 4.06 in the project evaluation

HACKATHONS

City of Balanga Kahanga-Hackathon — Balanga City, Philippines
Front-end Developer | Qualifier Entry level of 22 teams — Oct 2025

- Built LIWANAG (Lighting Intelligence with Automated Navigation for Analytics and Governance), a data-driven smart lighting system for public spaces
- Developed the React front end for the admin panel, dashboard analytics, and real-time IoT device status monitoring

SiKAPTala National CS & IT Competition | *Team Member* | *Top 10 Finalist, 600+ students* — Online (Philippines), May 2026

- Collaborated with a team to enhance an existing prototype of AGAPAY – a mobile application that helps people on medication stay organized, track their daily health and keep their doctors and family updated.
- Contributed to brainstorming and feature planning to improve the prototype

LEADERSHIP EXPERIENCE

Angatleta Sports | Bataan — Bataan
Communication Director — Aug 2023 – Aug 2024

- Led communications for the team, events, and programs of the organization
- Coordinated with more than 50 team members
- Managed team announcements and program posts to keep members and participants informed of events and activities

CERTIFICATIONS

AI & Machine Learning (DeepLearning.AI, Coursera): Machine Learning Specialization; Neural Networks and Deep Learning; Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization
Blockchain & Security: Blockchain Specialization (University at Buffalo, Coursera); Cybersecurity, IT Specialist (Certiport); Cyber Threat Management (Cisco)
Development & Digital: Software Development, IT Specialist (Certiport); Responsive Web Design (freeCodeCamp); Google Prompting Essentials (Google, Coursera); IC3 Digital Literacy Level 2 (American Council on Education)
